-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 2-5, 10 and 11 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 6-9 rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka (5,744,831) in view of Kon et al. (4,688,098).

Regarding Claims 1 and 6-9, Tanaka discloses a solid-state image pick-up device where in Fig. 1, a solid state image pick up device 20 having a photoreceiving section 3 disposed on the surface of a substrate 2. A readout gate 5 is disposed at one end of the photoreceiving section 7. A channel stop region 8 is disposed on the other end of the photoreceiving section 3. A vertical transfer register 7 is provided for each of the readout gate 5 and the channel stop 8 at the opposite end. Tanaka fails to disclose the electrode structure buried inside and insulating layer. However, Kon et al. disclose a solid state

image sensor with means for removing excess photocharges where in Fig. 1, electrodes 4 and 5 are buried inside insulating layer 7.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the buried electrodes inside the insulating layer in Tanaka as taught by Kon et al. in order to have an image pick up device with higher reliability and performance.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The examiner can normally be reached on M - F 8:00 - 5:00.
